OWNER-SIDE PMO SCOPE AT A GLANCE

CURRENT PMO GOVERNANCE & PORTFOLIO CONTROL SCOPE

- Owner-side PMO and Project Controls scope across engineering projects and operational assets.
- Planning, baseline monitoring, KPI dashboards, progress reporting, risk visibility and issue escalation.
- Coordination across planning, cost, document control, procurement, warehouses, site execution, legal, finance, technical offices and senior management.
- Weekly construction reporting and monthly operational asset reporting to improve executive visibility and action accountability.

PORTFOLIO GOVERNANCE & CONTROLS CAPABILITIES

SELECTED MAJOR PROJECT EXPOSURE

- Presidential District, including New Presidential Palace and associated facilities, New Administrative Capital, EGP 3B+ total works exposure.
- New Egyptian Opera House, New Administrative Capital, EGP 1.5B+ total works exposure.
- Grand Egyptian Museum, Giza, EGP 1B+ total works exposure.
- Embassy of the Kingdom of Bahrain, Cairo, diplomatic and administrative facility exposure.
- Multiple administrative, commercial and real estate development environments across Egypt and Bahrain.

DECISION SUPPORT VALUE

- Connects departments and project data into a structured governance and reporting environment.
- Converts project information into executive outputs that support risk identification, execution priorities, open action tracking and decision points.
- Supports senior management visibility across time, cost, quality, contracts, compliance, stakeholders and operational readiness.
